NOTES FROM THE CAPITOL

Interstate Commerce Commission May be Embarrassed

REGULATING D.C.CAR LINES

Panama Canal Commission Has Found Ordinary Variety of Bachelor an Incubus in the Social Economy of the Zone.

Commerce Commission may be embarrassed considerably in the near future with a large active, strenuous, and loud farmers by washing away the fertile White Elephant, unless its officials can humus, and lost the countries a great figure out some way in which to side-

step the laurden.
At its last session Congress delegated to the commission the task of regucommerce and labor that Spain is awaking the street car lines of the National Capital. Washingtonians brought a lot of pressure on the legislators for a universal transfer system for the city, and demanded a sweeping improvement in conditions. Congress was simply besigned with petitions. And the legislators hadn't time to delve deep into the matter, being se busy conceeting gag rules and listening to roll calls. Therefore the matter was shelved on to the Interstate Commerce Commission, which is now experiencing the same influx of petitions.

Citizens residing in Brightwood, a griculture once flourished. Hills, whose

Citizens residing in Brightwood, a suburb in the northern part of the city, recently came forward with a vociferous Rowl for through car service. At the present time they must transfer at the city limits to another car. They demand that the Brightwood Car company give them through car service to downtown points. The Brightwood Car company declares this impossible, and asserts they would lose money. The Brightwood suburbanites came out with another petition, asserting the car company of the car company declares the suburbanites came out with another petition, asserting the car company of the car company declares the suburbanites came out with another petition, asserting the car company declares the suburbanites came out with another petition, asserting the car company declares the suburbanites came out with another petition, asserting the car company declares the suburbanites came out with another petition, asserting the city, and the red rock laid bare where agriculture once flourished. Hills, whose appearance indicate that they once supported forests, are bald and dry now and without inhabitants. Verily, the commission is up against 0.

Washington, June 23.—The Panama ordinary variety of bachelor is an in cubus in the social economy of the rone. Suggestions have been made by to institute a curiew ordinance to make them go to bed at a proper time. Now the commission has discovered that the West Indian variety of bachelor doesn't as a result has undertaken to do that for him since June 1.

The West Indian bachelor, according to record. "is so frugal or careless that he actually denies himself the food nec-essary to sustain himself at the high-est point of effecincy for his ardnous work. To protect him from this is the object of requiring him to get his food at the mess kitchens."

He is left no choice in the matter. Like our own boyhood experiences when mother made us eat horrid string beans or squash before we could have cherry pie, he is obliged to file up to the long counter and receive his rations He might just as well do this as he has to pay for it anyway, so be usually does.
